

Client Brief

Existing car park showing signs of reflective cracking. Client ordered the whole car park to be resurfaced to improve customer experience while visiting the retail park.

Our part:

- MacDonald Surfacing were engaged by Facility Management provider Avison Young to resurface Castle Vale Retail Park car park over a phased program of 14 days consisting of daytime, nighttime and weekend working.
- MacDonald Surfacing contracted to replace all thermoplastic line markings as well as specialist paint markings for designated parking.

Our success:

- 17,000m² of car park resurfaced including the replacement of all thermoplastic line marking.
- The newly laid high performance wearing course will ensure a durable solution meeting the clients' requirements of having a safe and sustainable facility for their customers to visit.
- MacDonald Surfacing designed a program that ensured all businesses on site were able to remain open without affecting footfall.
- High levels of safety maintained throughout the program maintaining a safe public interface.
- Each phase deadline was met ensuring each phase was reopened in line with works program.
- Work completed to meet client deadline.
- Work completed to meet client budget.
